

DATA FACILITIES

EIS (Economic Intelligent Service)

This is a monthly review of the Indian economy. The different sectors covered here are the corporate sector, capital markets, infrastructure, industry, energy, agriculture, foreign trade, etc.

BUSINESS BEACON

This provides information on over 7000 macroeconomic indicators such as population, demography, public finance, money, banking, interest rates, national accounts, etc. The database contains annual, quarterly, monthly, weekly and daily indicators.

RMS (Regional Monitoring Services)

This monitors the progress of the economy of the states of India. The information provided goes down to the level of the districts. Currently, the states covered in this dataset include Punjab, MP, Rajasthan, Gujarat, UP and Uttaranchal. It provides information on agriculture, infrastructure, industry, investments, corporate sector, state public finance, banking, small saving collections, social sector, social welfare schemes and development indicators in districts.

IAS (Industry Analysis Service)

It is a comprehensive monthly analysis of Indian industry. It gives news and analyses of 65 sectors. It is in textual form, available in PDF format. It also provides time series of data and news extracts. The data include production, sales, prices, imports, exports, financial aggregates and stock market indicators.

PROWESS

Prowess is a corporate database. It contains a normalized database built on a sound understanding of disclosures in India on 8000 odd companies, which include public listed as well as public unlisted companies and co-operatives. The database provides financial statements, as well as ratio analysis, product profiles, return and risk on the stock markets, etc.

FIRST SOURCE

This is also a corporate database, but on the abridged financials of 245,000 Indian companies, many of which are private limited companies or, unlisted. The financials of these companies are not normalized.

MERGERS & ACQUISITION

This lists, analyzes and presents all information related to mergers and acquisition in India, including those of listed and unlisted companies. Each section is accompanied by tabular representation of deals, share price charts, pie charts and financial details of the companies.

CAPEX

Capex is a database on new and ongoing investment activities in India. It captures news on projects commissioned by both the Government and corporate entities. It includes projects in mining, manufacturing, electricity and infrastructure sectors. The database covers about Over 10,000 individual projects.

HARVEST

Indian Harvest is a database on Indian agriculture. It covers crop-wise details on area of production, yield, and farm harvest price disaggregated by districts, mandi prices, rainfall, and inputs like fertilizers, tractors, pump sets, as well as foreign trade and news abstracts.

MUTUAL FUNDS

This database contains complete details of all mutual funds and the Asset Management Companies in India. It contains both the portfolios as well as the NAVs of the funds.
